

## Good things come in small packages!

### New: The SecureGUARD STARTER series

For the sensational price of EUR 999 (+ VAT and ARSS, recommended retail price), you can purchase a fully-fledged solution which does not cost much more than a license.

### SecureGUARD & Microsoft

So your customers mainly have desktop and server operating systems from Microsoft – but they've got a **firewall** or a gateway from another manufacturer?

Why not make use of this potential business by offering your customers an **appliance** which can be integrated into the existing infrastructure like no other solution can?

No other **security gateway** communicates in such an optimal way with the Microsoft server applications as the **TMG 2010** on SecureGUARD hardware does.

In conjunction with the SecureGUARD management tools and the configuration services, the **STARTER Edition** offers you flexible security on the highest possible level.

Company-wide access, home office, mobile employees, web and mail traffic – all this can now be enabled in a secure way and managed centrally.

And incidentally: dealers can purchase an NFR version at a reasonable price.

### SecureGUARD STARTER Edition

#### Small & powerful

The STARTER Edition includes deployment, management, disaster recovery and configuration tools which make life easier for administrators.

#### Flexible & communicative

The new SecureGUARD STARTER Edition is at its most impressive in conjunction with the Microsoft applications Exchange, OWA, Active Directory, Sharepoint, Project Server and Terminal Server.

#### Versatile

Additional software from third-party manufacturers can be installed via the management interface, turning the STARTER series into a universal security platform.
